Midwest Prefinishing, Inc.

Request for Finish Quote Form

Standard Process (14 step, 3-5 coats)

- Pre-sand, one-coat oil-based stain (hand wiped), one-coat vinyl precat sealer, sand, one-coat precatalyzed lacquer
- Efforts will be made to minimize manufacture defects but the substrate determines the finish's final appearance
- Mouldings finished three-sided; stain or paint

Color Options

- Range of clear to multi-step dark colors~semi-trans and opaque
- Allow for variations caused by mineral content and natural coloring. Hand-toning will require additional charges
- Allow 2-5 business days to complete color-matching. Refer to Color Match Request Form at www.prefinishing.com.

Condition of raw material

- All material must be received finish-ready
- Midwest will defect out any manufacture related problems unless directed otherwise
- Midwest is not responsible for issues caused by poor substrate
